

Feed the World

Directions:

Through modern food production we can protect our valuable natural resources, produce more food and reduce food waste in an effort to produce enough food for our growing population.

1. Using the Internet, library or any other available resources, research at least three modern food production techniques, such as:
 - Cutting waste
 - Earth-friendly farming
 - Food biotechnology
2. Create a Microsoft® PowerPoint® presentation on each of the techniques you researched. Make sure to include the following:
 - How the techniques will help conserve our natural resources
 - How the techniques will help produce more food
 - How the techniques will reduce food waste
 - Citation slide listing all sources used
3. Share your presentations with the class and be prepared to answer questions.
