iCEV Online Curriculum Platform

iCEV knows CTE. We offer online curriculum and instructional materials for agricultural science, architecture, construction, transportation, and manufacturing. Business marketing, finance, IT, and media. Career exploration.

Family and consumer sciences. Health science, and law, public safety, corrections, and security. Our mission is to save you time by providing the resources you spend countless hours searching for and creating. iCEV is an all-inclusive, online instructional resource designed to make your life easier and your students more successful. How do we do this?

Think of your favorite streaming services. What do they have in common? They're online and accessible through multiple devices. They're constantly updating as new media is available, and they offer a wide variety of options based on your preferences. That's us, but for CTE. At iCEV, we do the work for you with a library of over 2,000 CTE lessons.

All our lessons are media based and are accompanied by a detailed lesson plan, project-based learning guides, interactive activities and assessments, and other amazing resources. Our award-winning online platform has a variety of tools to make classroom implementation a breeze. Assessment generators, built-in integration and customization options ensure our platform exceeds your needs, but our best feature is our connection with you.

We are focused on helping CTE teachers be the best they can be. To help you achieve this, we promise to always be there when you need us. We offer world class teacher support through comprehensive professional development sessions, online chat features, user friendly tutorials, and when you call our office, your call will be answered by a real person.

Your goal as a teacher is to make a difference in your students' lives. That's why we aim to provide you the resources you need to make the greatest impact. Just like an outstanding meal at a five-star restaurant is an unforgettable experience, so is an iCEV lesson. All great meals start with a menu, giving you the option to pick your favorite combinations. Just like a menu, our lesson plans are the menu of each iCEV lesson.

They provide you with step-by-step instructions to guide you through the lesson. Detailed description suggests the best approach to using the instructional materials included. The lesson plan includes goals and objectives, essential questions, ideas for bell ringers and exit tickets, as well as a thorough breakdown of each lesson component. Next, comes the main course.

The focal point of each iCEV lesson is the media content. Each lesson includes a video series or slideshow presentation. These resources address the main learning objectives in a captivating and engaging manner. Accompanying the main course are the sides.

Each iCEV lesson comes with a variety of side options. Action plans outlined to students daily list of tasks. Student handouts, vocabulary exercises, and project-based learning activities reinforce lesson concepts.

No meal is complete without the dessert. iCEV provides premade assessments to evaluate your students' comprehension of the objectives addressed in the lesson. Interactive assessments are automatically graded and help you pinpoint objectives that need to be readdressed. To finish the dining experience, our real-world career interviews serve as the after-dinner mint. The goal of CTE is to connect students to the world of work.

Our career interviews fulfill this by showing students how the lesson objectives are applied in current workforce settings. It would take you all day to cook a meal like this on your own, but with iCEV, you have access to thousands of menu options to help you create the best dining experience for your students. The iCEV platform is fully customizable, allowing you to tailor the tools to best fit your classroom.

Because iCEV is an online platform, our CTE library is constantly updated to reflect current state and national standards. This means you will never have to purchase another textbook ever again. You can access the iCEV platform from any device with internet capabilities, and you don't have to install software to use our materials. Another powerful feature is the assessment generator.

This tool allows you to create custom assessments from the iCEV test bank. You can even write your own test questions using our dynamic assessment offering tools. iCEV also integrates with your district's preferred learning management system, such as Google Classroom, Schoology, Canvas, Blackboard, Moodle, and more.

As a member of IMS Global, iCEV is certified as an LTI tool provider. This means resources from iCEV can be imported into your district's elements, allowing you to streamline access to course content and grading. All of these features make it simple to integrate technology in your classroom. Regardless of your technology capabilities, iCEV is user friendly for all.

At iCEV, we know every classroom, teacher, and student is different. Student licenses help you create an individualized educational experience for every learner. Using their personal iCEV log in, students can view multimedia-based lessons and complete interactive coursework on their personal devices anywhere there is internet access.

From innovative teaching methods and differentiation strategies to automatic grading and reporting features, student licenses help you get the most out of your iCEV subscription. With iCEV student licenses, you can easily incorporate a variety of teaching methods, such as in-person instruction, distance education, hybrid or flipped classroom learning models. Students can review multimedia lessons outside of class, allowing more time in the classroom for discussion, reinforcement, and implementation

of lesson topics. Because iCEV can be accessed anywhere there is an internet connection, students can easily complete missed work.

Not only do student licenses keep students on track, but they also make substitute planning a breeze and allow you to monitor student progress while you are out of the classroom. Differentiation is easy with iCEV student licenses. Because each student has their own iCEV account, they can learn at their own pace. Using the customization options, you can control what assignments and courses students have access to accommodate different learning styles and abilities.

Students have the ability to work ahead or review content as needed. Student licenses also give you access to iCEVs library of interactive coursework, such as student handouts, vocabulary exercises, and project-based learning activities. All interactive coursework is automatically graded, saving you time and providing options for immediate feedback. Customizable advanced grading reports lets you track progress by individual or class, allowing you to easily identify students who need additional learning support.

Reports can even be downloaded into an Excel spreadsheet. With iCEV student licenses, the options are endless, giving your students the tools they need to succeed. To ensure you are using iCEV to its full potential, we offer a variety of professional development options. On-site programs offer the most effective method of professional development.

In a face-to-face session, our curriculum consultants give you an in-depth demonstration of the entire iCEV platform. Online sessions allow you to schedule a professional development meeting based on your busy schedule. Using screen share features, our curriculum consultants provide detailed information over topics related to your specific needs.

The online chat feature allows you to get help when you need it. From 7 AM to 5 PM Central Standard Time Monday through Friday, our team is available to answer any question you have about iCEV. During CTE Inspired, iCEVs yearly virtual conference, you will have the opportunity to connect with education and industry experts. This free professional development opportunity equips you with tools and strategies to effectively implement the iCEV online curriculum platform in your CTE program.

We also offer a resource library, featuring easy to follow tutorials and guides that you can access at anytime. From live chat to in-person training, our dedicated team is here to provide you with initial and continued support so you can successfully implement the iCEV platform in your classroom.
