

# Drywall Guide

## *Directions:*

You will create a brochure or guidebook containing information about drywall and the process of installing drywall.

1. Use the Internet, magazines, books and/or additional sources to research the following:
  - Advantages and disadvantages of using drywall
  - Tips for choosing a type of drywall
  - Advice concerning drywall installation and repair
2. Organize your findings in a trifold brochure or bifold leaflet. You should NOT include step-by-step installation instructions in your guide, only tips, advice and information. Be sure to use proper terminology and include any graphics or photos necessary.
3. With your guide, turn in a citation sheet listing all sources used.
