

Emergency Plans

Directions:

Create an emergency plan for the classroom in response to a chosen natural or man-made disaster. Examples include: hurricanes, tornadoes, wildfires, explosions, gas leaks and shop fires. Fill in the information below to create your plan.

1. What type of disaster is this plan to be used for?
2. Where are the first aid kit and fire extinguisher located?
3. Where is the main electrical breaker for the shop?
4. What emergency personnel should be contacted in this case? What are their local numbers besides 911?
5. In the case of this emergency, what are at least five steps which must be taken? List steps in order.
6. Is evacuation of the shop necessary? If so, where is the designated area for students to gather and how do they exit the shop/classroom? Give specific directions.
