

# Braking System Guide

## *Directions:*

For this *Activity*, you will create a step-by-step guide for repairing and servicing the braking system. This guide should be directed towards technicians which are just entering the diesel engine workforce.

1. Write a short paragraph describing the importance of the braking system. Include the importance of repairing and servicing the system.
2. Create a bulleted list of the procedures for repairing and servicing the braking system. You may use any resources available to help create this guide.
