

# Welding & Cutting Processes Comparison

*Directions:*

1. Using the Internet, library or any other available resource, research and write a paper which compares and contrasts oxy-fuel welding with other welding and cutting processes. Choices include but are not limited to: flux cored arc welding (FCAW), shielded metal arc welding (SMAW), gas metal arc welding (GMAW), gas tungsten arc welding (GTAW), etc. Be sure and give a short description of each welding type you discuss.
2. Be sure the paper is double-spaced and at least one page in length.
3. Be sure to cite any sources used.
